about

Frontend-focused Web Developer who has been actively learning and building since 2023, with hands-on experience creating responsive and interactive user interfaces. Strong in modern JavaScript and frontend technologies, particularly React.js, with the ability to design clean, user-friendly layouts and dynamic web experiences. Skilled in translating design concepts into functional applications, implementing reusable components, and ensuring cross-browser compatibility and performance optimization. Passionate about crafting engaging UI/UX, continuously improving skills, and building visually appealing, production-ready frontend applications, while maintaining clean, organized, and maintainable code.
